TURNING SPACES INTO SUCCESS STORIES SINCE 1999

For over 25 years, Lavish has built an exceptional reputation in both the Residential and Commercial communities, both domestically and internationally by cultivating incredible relationships on the foundation of absolute customer satisfaction. Along the course, we have worked with designers, architects, and homeowners to help them bring their ideas to realization.

Owing to our passion for ceramic surfaces from day one, today we have gained unrivaled expertise in crafting innovative and bespoke ceramic/porcelain surfaces. From the day we started, we have been steadfastly committed to offering our customers reliable and exceptional service — regardless of scope or complexity, which makes us one of the top tile exporters in the nation. As we move forward, one thing will not change — our time-honored dedication to product excellence and customer satisfaction.

Build Avenue

B2B Publication for Indian Building Material Trade

Build Avenue magazine was established in 2008 as a physical publication with the aim of serving the ceramic and building material industry in India. Over the years, it has become an indispensable part of the Morbi ceramic industry. However, in order to adapt to the changing times, Build Avenue has transformed into a fully online magazine and also publishes printed special editions. Our readership primarily consists of ceramic manufacturers, ceramic and building material dealers, distributors, architects, interior designers in India, as well as importers of ceramic tiles and sanitaryware from around the world.

Build Avenue's primary focus is on showcasing new technologies, highlighting the latest product launches, showcasing innovative projects, and sharing important developments within and related to the ceramic industry. We also collaborate with and provide coverage of domestic and international exhibitions and events to ensure that our readers stay well-informed.

Our vision is to promote the ceramic industry both domestically and internationally, establishing ourselves as a reliable source of information for manufacturers and their channel partners.

To Know more please visit our website
www.buildavenue.com

UNIMAXX is grounded in the belief that as India experiences exponential growth, we are poised to assist businesses in expanding their presence in both Indian and international markets, employing a highly professional approach. Our extensive range of services includes event management, exhibitions, business promotion, lead generation, customer acquisition, operational support, market research, launch research, and network establishment. We also offer advertising, promotion, stall booking, and event/exhibition marketing services. Importantly, these services are readily available to international clients seeking to promote their products within India.

Our expertise extends to business promotion in both domestic and international arenas. At every level, our team consists of skilled and experienced professionals dedicated to excellence in business promotion. We adopt a "Phygital" approach, combining physical and digital strategies to establish markets. Leveraging advanced database and CRM models, we curate the most promising leads and customers. Our marketing approach is characterized by its professionalism and our capability to study, analyze, and strategize product and brand launches on an international scale.

With a team comprising adept operatives and deal makers, UNIMAXX confidently stands by its commitment to deliver top-tier services to our valued clients.

MORBI CERAMIC INDUSTRY FACT FILE

Morbi, The Ceramic City OF INDIA' has undergone a remarkable transformation from being a town primarily focused on producing roof tiles (naliya) to becoming a hub for modern, highly automated tile manufacturing units that produce world-class ceramic products. This transition has been made possible due to the hard work and visionary approach of the industrialists in Morbi, who possess exceptional entrepreneurial skills.

Build Avenue magazine proudly recognizes and applauds the entrepreneurs of Morbi for their achievements.

Here are some notable facts about the Morbi ceramic cluster:

- The cluster comprises around 1000 units, covering an expansive area of 450 square kilometers.
- Morbi benefits from the availability of raw materials, skilled labor, and a robust infrastructure.
- The cluster produces over 3 billion square meters of ceramic products.
- Morbi is the second-largest ceramic cluster in the world.
- The range of products includes ceramic tiles, sanitary wares, and various other ceramic items.
- Morbi is globally renowned for its exceptional quality, innovative designs, and competitive pricing.
- Approximately 30% of the cluster's production is exported to international markets.
- The industry plays a crucial role in generating employment opportunities for millions of people.
- Morbi's ceramic cluster is experiencing rapid growth, expanding its influence in the industry.

GEOGRAPHICAL LOCATION AND FACILITIES

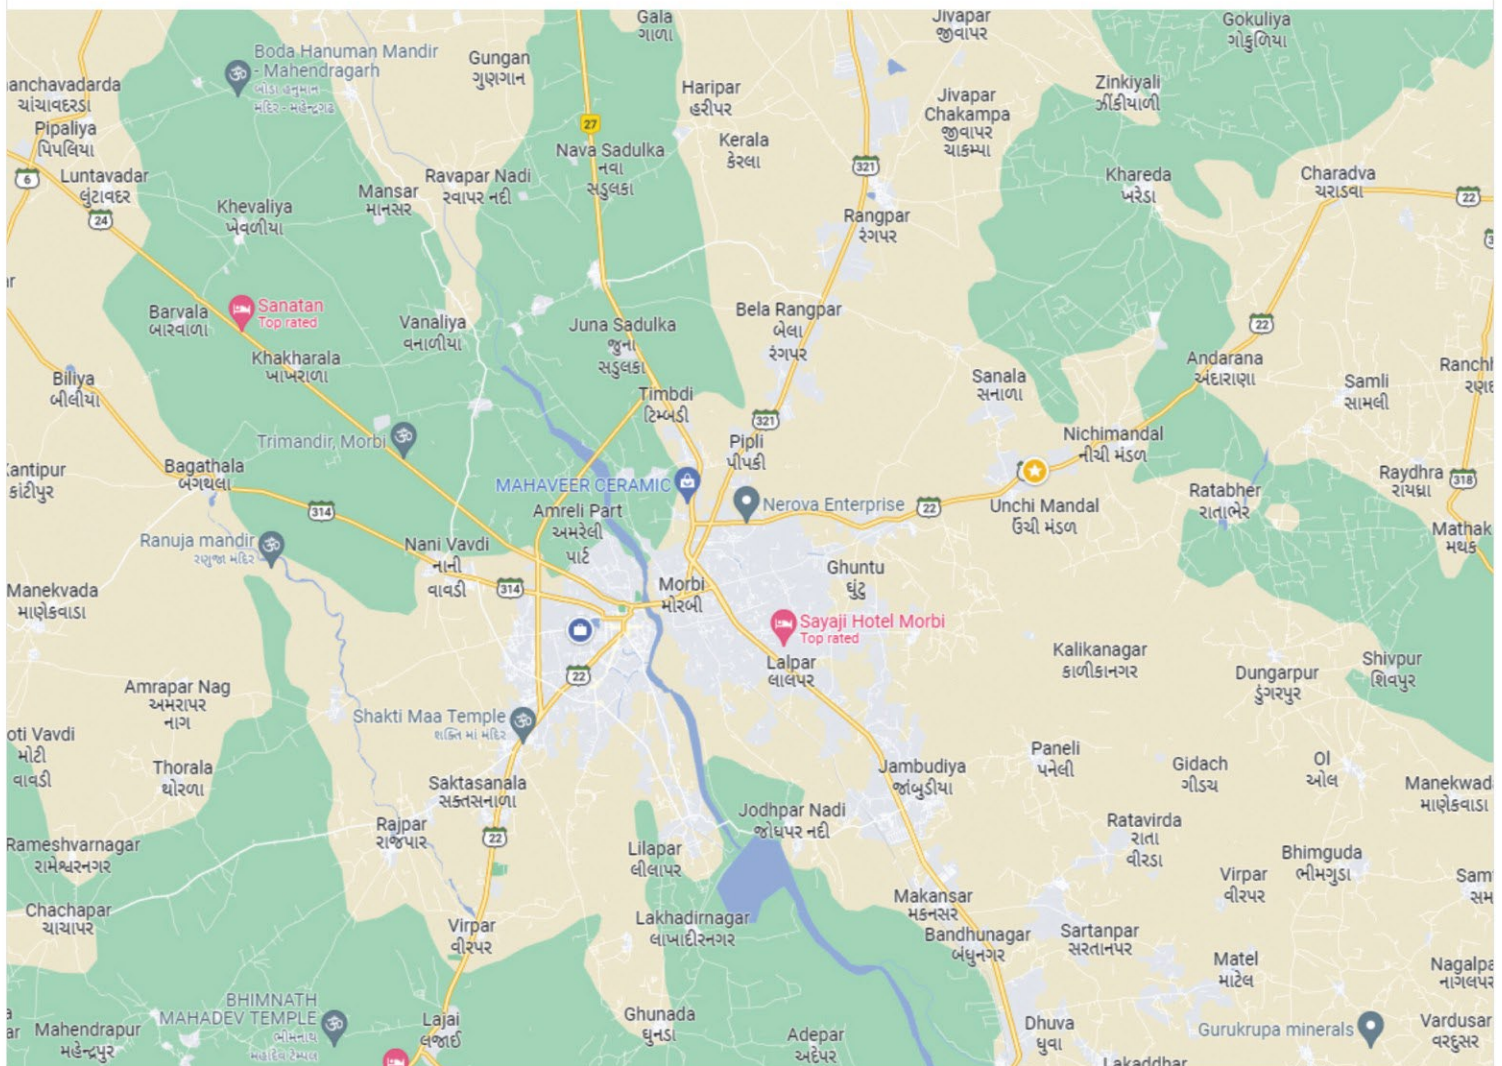

Morbi is located on western part of India. The ceramic hub benefits from convenient and swift transportation links to key regions within the state, making it an optimal location for exports. Morbi is situated just 68 kilometers away from Hirasar Airport (Rajkot International Airport) and boasts excellent rail and road connections to Ahmedabad.

Furthermore, Morbi's accessibility to the Kandla and Mundra ports enhances its potential for international trade, providing an extended reach for global exports.

There are approximately 1,000 ceramic product manufacturing units scattered across a sprawling 450-square-kilometer area in Morbi. Some of these areas include Ghutu Road, Makansar, Sartanpar, Matel Road, Lalpar, Halwad Road, Jambudiya, Pipli Road, Jetpar - Rangpar Road, Dhuvu, National Highway No 8A and more. Additionally, there are business complexes, where domestic traders have their offices. Morbi also boasts corporate-level buildings housing major exporters and manufacturers.

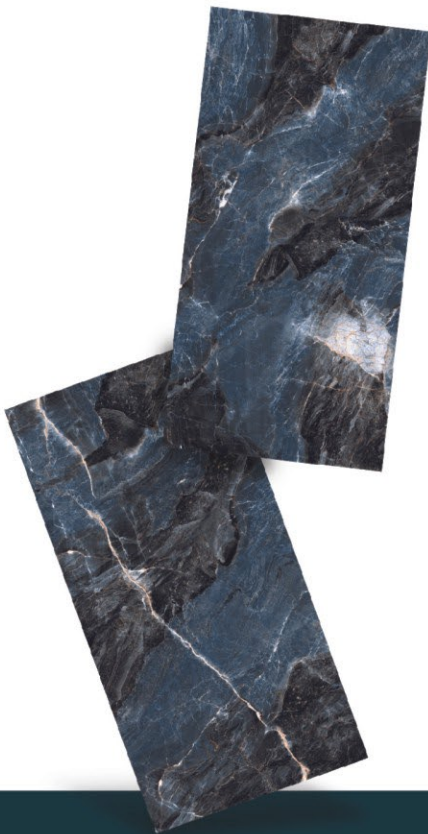

There is world-class quality checking agencies in Morbi, providing buyers with assurance of product quality. The city offers a range of facilities for business travellers, including a variety of reputable hotels. These amenities ensure convenience and comfort for visitors conducting business in Morbi.

WHATSAPP

PRODUCTS AT A GLANCE

GVT

These tiles feature a surface adorned with a layer of glaze, providing a versatile canvas for the application of various designs using high-volume inkjet printers. This ingenious method allows for the customization of designs and colors on the top 2-4mm layer of each tile. Crafted through the verification process, these tiles exhibit exceptional durability and longevity, with the additional glaze layer enhancing their overall strength.

With a wide spectrum of colors, designs, and finishes to choose from, these tiles have become a favored flooring choice, capable of withstanding heavy foot traffic. What's more, they offer safety benefits with finishes like matte,

satin matte, and lapato, which enhance traction and reduce the risk of slips and falls.

Moreover, these tiles are not limited to flooring; they are also a superb choice for wall installations, particularly in high-traffic areas where walls are prone to frequent contact and staining. Their easy-to-clean nature means that often, a simple wet mop and soapy water are all that's required to remove stains and blemishes.

PGVT

As implied by their name, Polished Glazed Vitrified Tiles (PGVT) boasts a highly reflective, polished surface. They offer a broad spectrum of designs and colors, ensuring the availability of a tile to complement any chosen color scheme or decor theme. These tiles feature a glossy

finish, which imparts a dazzling, mirror-like appearance to the spaces they adorn, adding a touch of sophistication.

While their stunning aesthetics are undeniable, Consequently, they are best suited for residential settings like living rooms, dining rooms, and bedrooms, where foot traffic is less intense.

However, as wall tiles, PGVT tiles are incredibly versatile and can be employed in nearly all areas of residential and commercial spaces. They find applications in kitchens, bathrooms, offices, showrooms, boutiques, malls, and more, enhancing the visual appeal of these spaces with their radiant finish.

GVT & PGVT are distinguished by their digitally printed designs on the top tile layer. These tiles offer a diverse range of design options, including marble, wood, and floral

patterns, making them suitable for both commercial and residential settings. Typically sporting a matte finish, GVTiles prioritize safety by enhancing traction and reducing the risk of accidents. Consequently, they are an excellent choice for high-traffic areas like shopping malls, airports, metro stations, restaurants, and bars.

Moreover, GVT/PGVT tiles are equally well-suited for wall installations due to their durability and ease of maintenance. Spaces such as bedrooms, kitchens, living rooms, and bathrooms can all benefit from these tiles, whether applied on floors or walls.

Their versatility ensures that they enhance the aesthetics and functionality of various indoor spaces.

FULL BODY VITRIFIED TILES

Full-body vitrified tiles, also known as through-body vitrified tiles or unglazed vitrified tiles are a type of ceramic tile known for their exceptional durability and color consistency. Unlike standard glazed tiles, where the color or pattern is only on the surface, full-body vitrified tiles have a consistent color and texture throughout the entire thickness of the tile. This means that if the tile chips or wears down, the color and texture remain the same, as they are not dependent on a surface glaze. Full-body vitrified tiles are easy to clean and maintain. They are typically stain-resistant and require minimal effort to keep them looking new.

These tiles are highly resistant to wear and tear, making them suitable for high-traffic areas in both residential and commercial spaces. They are less prone to chipping and scratches.

They are available in various sizes, finishes, and styles, making them suitable for a wide range of design applications, including floors and walls.

Overall, full-body vitrified tiles are a popular choice for those seeking a durable and long-lasting flooring or wall covering solution with a consistent appearance. They are particularly favored in spaces where maintaining the original appearance is crucial, such as in commercial settings and high-traffic areas.

COLOR BODY VITRIFIED TILES

Color-body vitrified tiles are a type of ceramic tile that falls between full-body vitrified tiles and glazed tiles in terms of their composition and appearance. These tiles are engineered to have a body (interior) that closely matches the color or pattern of the surface glaze.

Color-body vitrified tiles are durable and capable of withstanding wear and tear, making them suitable for a variety of indoor and outdoor applications. These tiles offer a wide range of design options, allowing for creativity in interior and exterior design projects. They are available in different sizes, finishes, and styles to suit various aesthetic preferences.

Like full-body vitrified tiles, color-body vitrified tiles are relatively low-maintenance and easy to clean.

Overall, color-body vitrified tiles strike a balance between the durability and color consistency of full-body vitrified tiles and the design versatility and surface glaze of traditional glazed tiles. They are a popular choice for those who want the durability of vitrified tiles with the added benefit of varied surface designs and patterns.

SLAB TILES

As consumers and home builders look for open floor plans with enticing aesthetics, demand for larger kitchen platforms and surfaces has increased. As a result of this demand, producers are increasing the variety of big-sized products they offer.

Big-sized surfaces can now be produced more easily and affordably. Adequate advancements in machinery and equipment have empowered

manufacturers to produce large slabs with accuracy and efficiency providing improved cutting, shaping, and finishing methods.

The proliferation of slabs and large format tiles has also been aided by the availability of a wide range of materials appropriate for large-sized surfaces. Engineered quartz, porcelain, and ultra compact surfaces are common choices to produce slabs because of their durability, adaptability, and aesthetic options.

Market expansion and competition have both increased as a result of rising consumer

demand. While new businesses are entering the market to specifically meet the demand for large-sized surfaces, existing manufacturers are expanding their product lines to include larger sizes.

Customers are increasingly looking for distinctive and personalized designs for their requirements. Manufacturers are leveraging this trend by providing customization options, including large surfaces customized to specific needs.

DIGITAL WALL TILES

Digital tiles encompass a diverse range of tiles featuring digitally printed designs achieved through cutting-edge technology. This technological advancement facilitates the creation of sharp, distinctive imagery on tile surfaces. The extensive array of styles, designs, and colors available makes digital tiles suitable for a wide spectrum of settings, including both residential and commercial spaces. These tiles find versatile

utility as flooring and wall coverings and are commonly incorporated in various areas such as kitchens, bathrooms, bedrooms, prayer rooms, as decorative accents, and within commercial establishments like offices, bars, restaurants, and hospitals, among others. In summary, digital tiles can enhance the aesthetics of virtually any space, infusing it with vibrant colors and captivating designs.

SANITARYWARE AND BATH FITTINGS

Sanitaryware refers to the various fixtures and fittings found in bathrooms and toilets that are designed for the purpose of sanitation and personal hygiene. These products are typically made from ceramic materials, porcelain, or other materials that are easy to clean and resistant to water and chemicals. Common examples of Sanitaryware include. Morbi manufacturers Toilets, Basins-Sinks, Bathtubs, Bidets, Urinals, Accessory and Bathroom furniture. Sanitaryware is an essential part of any modern bathroom or restroom, and it plays a crucial role in maintaining proper hygiene and sanitation. Manufacturers produce a wide range of designs and styles to suit different aesthetic preferences and functional needs.

www.itilellp.com

EXPORT

India exports its ceramic products to more than 125 countries.

Marketing teams enthusiastically delved into the exploration of various price-value propositions they could present to the global market. Leveraging digital networking, they delved deeply into understanding and comparing global competition, providing a comprehensive overview of the ceramic sector on a global scale.

This exploration spanned across multiple regions, with a specific focus on the American Subcontinent, Europe, Africa, and Australia as potential new markets. Meanwhile, in regions like the Middle East and Far East, which already had ties to Indian ceramic product imports, efforts were made to enhance their value further.

Each region had its unique requirements and demands, but entrepreneurs in Morbi possessed the necessary resources and expertise to fulfill these needs. Consequently, businesses in the region began innovating their processes, upgrading equipment, and enhancing workforce efficiency. These improvements translated into better operational performance through the adoption of advanced industrial engineering practices.

The development of new designs and high-performance products for the global market became a regular practice rather than an

occasional event. The application of global quality standards ensured that products met the expectations of markets and importers worldwide.

Both new and existing products with enhanced properties, as well as entirely new product categories, were upgraded to meet the demands of global consumers. As more players invested in international marketing, there was a growing willingness among businesses to engage in offshore activities such as face-to-face meetings, participation in trade shows, and product exhibitions.

In the Indian subcontinent, favorable factors related to costing and pricing had always played a significant role in the ceramic industry. For ceramic exports, proximity to ports and efficient road transport to these ports contributed to a competitive advantage.

The ability to offer competitive pricing for ceramic products while maintaining sustainable profit margins proved to be a win-win situation for both sellers and buyers across borders. This dynamic fostered long-term, sustainable trade relationships.

U NICERA Sets a New Record

UNICERA - the International Ceramic Bathroom Kitchen Fair, Turkey's largest and the world's second-largest trade fair, achieved a remarkable feat. The event spanned an expansive 80-thousand-square-meter venue and garnered significant attention from a total of 112,698 professionals in the industry, including 26,934 international attendees.

Visitors hailing from 130 countries, primarily from the Eurasian region, displayed immense enthusiasm for the fair. UNICERA's prowess as a global brand was once again evident, as it achieved this unprecedented turnout of international buyers.

The fair will showcase a diverse array of offerings, including bathroom products, flooring and wall materials, ceramics processing technologies, kitchen essentials, decorative items, as well as packaging and storage solutions. Preeminent global manufacturers are slated to unveil their latest innovations exclusively at UNICERA Istanbul.

UNICERA will serve as the focal point for the world's leading international companies in the industry. Over the course of 5 days, exhibitors will have the invaluable opportunity to acquaint themselves with novel products, designs, and cutting-edge technologies within the ceramics, bathroom, and kitchen sectors.

Caspian Construction Week kicks off in October

The autumn exhibition season is set to kick off from October 19th to 21st with the much-anticipated Caspian Construction Week. This premier regional event will feature three prominent exhibitions: the 3rd Azerbaijan International Restoration, Reconstruction, and Development of Karabakh Exhibition (Rebuild Karabakh), the 28th Azerbaijan International Construction Exhibition (BakuBuild), and the 15th Anniversary International Exhibition for Heating, Ventilation, Air-Conditioning, Water Supply, Sanitary, and Swimming Pool (Aquatherm Baku). Simultaneously, the 11th Caspian International Road Infrastructure and Public Transport Exhibition (Road& Traffic) will also be held at the same time. These exhibitions will take place at the esteemed Baku Expo Center.

This year, the exhibitions are expanding in scale, with three halls of Baku Expo Center being occupied, as opposed to the two used in the previous year. Notably, these exhibitions will also venture into the open spaces of the Baku Expo Center.

Adding to the significance of this year's Caspian Construction Week is the celebration of the 100th anniversary of Heydar Aliyev, the National Leader of the Azerbaijani nation. This milestone is integrated into the event's program.

Participating in these exhibitions are companies from various countries, including Azerbaijan, Belarus, the Czech Republic, China, Finland, France, Germany, Great Britain, Hungary, Iran, Italy, Kazakhstan, Netherlands, Poland, Russia, Slovenia, South Korea, Spain, Turkey, UAE, Uzbekistan, and more. Additionally, Germany, Hungary, Russia, and Uzbekistan will host national and regional stands.

Rebuild Karabakh, in its third year, remains the only specialized exhibition dedicated to the reconstruction of the region. Its mission is to raise awareness about the positive changes occurring in Karabakh and engage companies in the region's restoration efforts. The exhibition seeks to attract international investment in Karabakh, promote foreign company participation, and facilitate the revitalization of regional infrastructure and civil facilities.

These exhibitions encompass a wide array of sectors, including ecology, energy, information technology, agriculture, mining, transport, food industry, health, energy-saving systems, smart home solutions, security, education, tourism, cultural heritage, road construction, and infrastructure.

BakuBuild and Aquatherm Baku, both long-standing exhibitions, introduce innovative construction goods and services to the national market. BakuBuild highlights advancements in construction and related technologies, fostering business connections, while Aquatherm Baku leads in heating, ventilation, swimming pools, and air conditioning equipment, presenting an extensive range of related products and technologies.

Road & Traffic, a specialized event in road infrastructure, offers a meeting place for professionals in road construction, public transport, road safety, and information technology.

These exhibitions, known for their informative sessions and panel discussions, provide valuable insights and networking opportunities. Additionally, the business program includes discussions on the "Great Return" to liberated territories and bilateral business meetings. Special displays dedicated to Heydar Aliyev's 100th anniversary, Shusha, and Karabakh's cultural heritage will also be featured.

Supported by various government entities and organizations, Caspian Construction Week is organized by Caspian Event Organizers and Iteca Caspian in collaboration with their partners. For further information, please visit the exhibition's official webpages and social media profiles.

ABOUT US

Leadsun Ceramic is renowned for its stunning new collections, distinguished by high-definition digital printing. With a long-standing commitment to quality and an unwavering dedication to modernization, we have earned a reputation as a prominent exporter and supplier. Our products are cherished by both national and international clients, who appreciate our consistent availability, reliable supply, and competitive pricing. We take pride in offering premium ceramic products in every aspect.

Our industry boasts a remarkable degree of self-sufficiency, abundant access to raw materials, technical expertise, and robust infrastructure, all while remaining reasonably capital-intensive. This sustained growth has positioned Leadsun Ceramic as a primary driving force in the Indian ceramic tile sector. Our technological advancements have ushered in a multitude of new tile designs and applications, catering to homeowners and commercial establishments within India and abroad. We promise a wide array of exceptional and aesthetically pleasing products that will undoubtedly captivate your senses.

OUR VISION

We aspire to attain global recognition in the field of ceramic building products through continuous research and innovation, making enhanced lifestyles accessible to households worldwide. Our unwavering commitment to excellence permeates everything we do. We embrace change as a natural part of our evolution, and above all, we strive for constant improvement.

OUR MISSION

At Leadsun, we are dedicated to delighting our customers with world-class ceramic products and services. We aim to establish Leadsun as synonymous with the highest quality and to set new standards of excellence for all stakeholders. We pursue the best business practices with utmost integrity, making Leadsun an exciting organization to collaborate with for vendors, channel partners, investors, and employees alike.
